**\*\*DEPENDING ON YOUR VEHICLE SETUP, YOU CAN MOUNT THIS ON THE PASSENGER OR DRIVER OF THE VEHICLE\*\***

**Be sure to shop our online store for the best deals: [www.uprproducts.com](http://www.uprproducts.com)**

1. Depending on which side you decide to mount, you are going to take the can with the small bracket and 2 short spacers and use the existing hole on the strut tower tab.
  - a. You are going to want the can to face towards the engine

2. You are going to attach the 5/8 braided hose with the built in T to the can. The shorter line will connect to that side of the valve cover that is closest to the can.

3. Connect the longer side of the hose to the opposite side of where the can is mounted.
